- Sept 6th (Monday)
  - Labour Day → No work
- Sept 7 (Tuesday):
  - Discussion with Alonso for the docker build for CenterPoint
    - He is not sure what is causing the issue either.
      - What should be the next step? Who else should I reach out to.
    - To Eduardo: Could you try build the docker and see how it goes on your side
  - HYLDA Paper proofread:
- - Sept 8 (Wed)
  - Finish the paper proofread and comments
  - Modify the testing pipeline for TSIT
    - Changing input, dataloaders, etc
      - Use the validation set of the dataloader instead of testing set
  - Run the testing results
